SUMMARY

Web Developer with over 5 years of experience as an Electronic Builder. Recently graduated from a 6 month long bootcamp with a certificate in full-stack development where over 250 classroom hours were spent hands-on coding in JavaScript, React, CSS, HTML, & PostgreSQL. Adeptness at swiftly adapting to project requirements, efficiently completing assignments within designated timelines, and deriving enthusiasm from engaging in real-time development work. Despite being relatively new to the field, I am assured in my capacity to apply acquired knowledge effectively, collaborate seamlessly with team members in assigned roles, and demonstrate unwavering integrity in my work.

TECHNICAL SKILLS

Proficient: Node, Javascript, React / CSS / HTML

Knowledgeable: PostMate / VSCode / BootStrap / PostgreSQL

Some Experience: Python / .Sass

TECHNICAL PROJECTS

Web Watchers | Co-Developer among 3 peers | September-October/2023 | [Link to the project](#)

Summary: Website created to review other websites on the internet and see other user reviews

- Collaborated with 3 other developers to design, develop, debug, and deploy the web application.
- Developed within a 4 week timeframe and fully functional base components.
- Crud Operations employed in problem solving using backend SQL for data management.
- Api Functional endpoints allowing for modification of datasets through user interaction(Delete/Patch/Post)
- React Js is the core language used and React DOM to establish parent-child function relationships
- Clean simple bootstrap CSS all applied to a single HTML page that can render all JS functions allowing dynamic presentation.
- Tools: HTML, CSS, Javascript, Node.js, React(DOM), PostgreSQL, Postmate

Puppy Bowl Demo | Solo Developer | August/2023 | [Link to the project](#)

Summary: Website created to review other websites on the internet and see other user reviews

- First foray into React JS for website development by transitioning traditional HTML,CSS,JS to React
- Learned to utilize Node.js to delve into .jsx allowing new component imports for cleaner integration.
- Increasing understanding of JS and Node through new testing components utilized in the website.
- The basis for future projects going forward.
- Tools: HTML, CSS, Javascript, Node.js, React

EXPERIENCE

Electronic Builder | Omega EMS | San Jose, CA

October/2018 - October/2023

- **Consistently** achieved nearly 300% over goal for pace and accuracy performance when constructing products sent my way.
- **Adaptable** and quickly gained familiarity in a new work/assignment and able to produce intended results on par with co-workers and quicker once a few are built.
- **Exhibited** collaborative prowess when working with others at a steady pace without breaking a normal workflow ethic and providing my contributions to fulfill the task.
- **Readily** completing what is assigned, seeking help and learning what I need from those around me when the need arises.

EDUCATION

Fullstack Academy Web Development Bootcamp

May/2023 - November/2023

Software Engineering Certificate

Full-time, Full Stack Javascript Web Development Immersive

DeAnza College

June/2023

Bachelor of Science in Subject - 50 Credits

Relevant Courses: Biochemistry, Biology 6C, Chemistry 6B

VOLUNTEER EXPERIENCE

Sacred Heart Volunteer

- The Summer of 2016 (June - August)
- Helping distribute food to those that needed food at home.

OurCity Forest Volunteer

- This was done during the year of 2017 every weekend for the entire year.
- Something we were able to accomplish was successfully raising a few endangered species and cross breeding them, keeping them thriving and growing.
